

Kap Europa logistics space

For your event at Kap Europa, you have the possibility to hire a logistics area directly opposite our loading bay. There you can park your vehicles permanently after unloading, during set up as well as on event days. You can either hire the entire area (subject to availability), half of the area or alternatively a parking ticket for up to three cars / vehicles up to 3.5t.

The reservation of this area is done by your responsible project manager at Kap Europa.

In the course of a tour of this area with you and a representative of the Facility Engineering team, a note is made of any pre-existing damage in a handover log. After dismantling a similar procedure is conducted and a handback log created.

The rental costs for the logistics space will be added to your final invoice post event.

Please note that permanent parking within the loading bay at Kap Europa is not permitted.

Conditions 2018

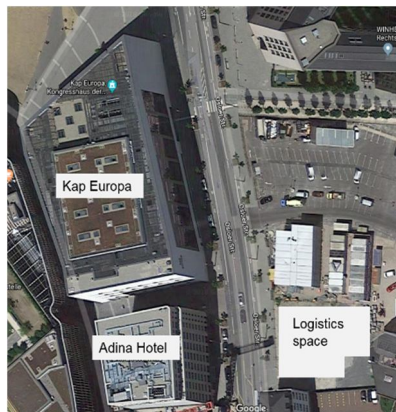

All prices shown are net. VAT at the applicable rate must be added to all net prices.
